SUMMARY

A Full-Stack / Frontend developer with an eye for design and a strong desire to learn and create. A problem solver with high attention to detail. A creative and curious, constantly exploring new ideas and technologies. Strong communication and collaboration skills, with the ability to work in both team and independent environments.

SKILLS

JavaScript · CSS · HTML5 · Git · React.js · Redux.js · Vue.js · Vuex · Node.js · MongoDB

EXPERIEMCE

2023   Weather

Fully responsive web app allows users to easily search for and view real-time weather forecasts for cities around the world. The app features an intuitive city search with autocomplete functionality, and users can save their favorite cities to easily access their weather forecasts. **Built with AccuWeather-API, HTML, CSS, React.js, Redux, and Hooks.**

2022   Infocrypt

Digital wallet web app. User can add funds to their wallet   balance, stay up to date on the latest currency exchange rates and make transfers to contacts. The app also offers full CRUD functionality for managing contacts, allowing users to add, update, and delete contacts as needed. **Built with CoinGecko-API, HTML, Sass, React.js, Redux, and Hooks.**

2022   Tasko

Task management web app inspired by Trello. The user can build a board from scratch or create a board from an existing template that can also be edited. This project was   developed as part of a bootcamp graduation. We created a pixel-perfect Trello clone and implemented many of its features like Drag and Drop and Socket.io for real-time updates.
Built with HTML, Sass, Vue.js, Vuex, Node.js, Express and MongoDB.
